

The Halyard* Sterilisation Wrap Journey

HALYARD* sterilisation wrap protects instrument sets every day in the CSSD until point of use in the operation room (OR). Made from 100% polypropylene (PP). It is designed for performance and can deliver value beyond use.

FROM PROTECTION TO CIRCULAR VALUE

Made from Polypropylene
a category 5 recyclable material

THE JOURNEY: FROM BLUE TO NEW

What could this mean in practice?

Meaningful CO₂ savings through material recovery
Lower CO₂ impact by leveraging end-of-life recycling pathways.

Measure impact
Gain visibility with data and reporting (dashboard).

Rising costs of waste disposal
Cost-conscious recycling model.

Preserve resources
Keep valuable materials in the loop. Recovering wrap waste preserves resources and reduces environmental impact.

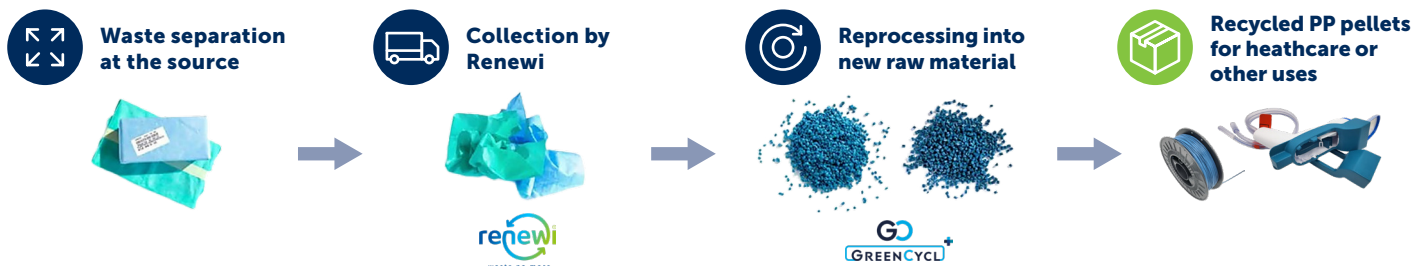

How it works - Enabling the next step

Through collaboration with HALYARD* and Renewi hospitals benefit from:

- Dedicated collection solutions for PP wrap
- Recycling high-quality material
- Support in achieving sustainability goals
- Reprocessing into new raw material

Together we support the transition from make-use-dispose to make-use-reuse

From Blue to New
